Debian -- Debian Releases

Debian Releases

Debian Releases

Debian always has at least three releases in active maintenance: stable, testing and unstable.

stable

> The stable distribution contains the latest officially released distribution of Debian.
>
> This is the production release of Debian, the one which we primarily recommend using.
>
> The current stable distribution of Debian is version 13, codenamed *trixie*. It was initially released as version 13.0 on August 9th, 2025 and its latest update, version 13.7, was released on September 12th, 2026.

testing

> The testing distribution contains packages that haven't been accepted into a stable release yet, but they are in the queue for that. The main advantage of using this distribution is that it has more recent versions of software.
>
> See the Debian FAQ for more information on what is testing and how it becomes stable.
>
> The current testing distribution is *forky*.

unstable

The unstable distribution is where active development of Debian occurs. Generally, this distribution is run by developers and those who like to live on the edge. It is recommended that users running unstable should subscribe to the debian-devel-announce mailing list to receive notifications of major changes, for example upgrades that may break.

The unstable distribution is always called *sid*.

Release life cycle

Debian announces its new stable release on a regular basis. The Debian release life cycle encompasses five years: the first three years of full support followed by two years of Long Term Support (LTS).

See Debian Releases Wiki page and Debian LTS Wiki page for detailed information.

Index of releases

See the Debian FAQ for an explanation of where all these codenames came from.

Version	Code Name	Release Date	End of Life (EOL)	End of LTS	End of ELTS	Status
15	Duke	TBA	TBA	TBA	TBA	Codename announced
14	Forky	TBA	TBA	TBA	TBA	testing — no release date has been set
13	Trixie	2025-08-09	2028-08-09	2030-06-30	2035-06-30	Current stable release
12	Bookworm	2023-06-10	2026-07-11	2028-06-30	2033-06-30	Current oldstable release
11	Bullseye	2021-08-14	2024-08-14	2026-08-31	2031-06-30	Current oldoldstable release, under LTS support
10	Buster	2019-07-06	2022-09-10	2024-06-30	2029-06-30	Archived release, under third-party paid extended LTS support
9	Stretch	2017-06-17	2020-07-18	2022-07-01	2027-06-30	Archived release, under third-party paid extended LTS support

Historic releases

The web pages for the obsolete Debian releases are kept intact, but the releases themselves can only be found in a separate archive.

Version	Code Name	Release Date	End of Life (EOL)	End of LTS	End of ELTS
8	Jessie	2015-04-25	2018-06-17	2020-06-30	2025-06-30
7	Wheezy	2013-05-04	2016-04-25	2018-05-31	~2020-06-30
6	Squeeze	2011-02-06	2014-05-31	2016-02-29	—

5	Lenny	2009-02-14	2012-02-06	—	—
4	Etch	2007-04-08	2010-02-15	—	—
3.1	Sarge	2005-06-06	2008-03-31	—	—
3.0	Woody	2002-07-19	2006-06-30	—	—
2.2	Potato	2000-08-15	2003-06-30	—	—
2.1	Slink	1999-03-09	2000-09-30	2000-10-30	—
2.0	Hamm	1998-07-24	—	—	—
1.3	Bo	1997-07-02	—	—	—
1.2	Rex	1996-12-12	—	—	—
1.1	Buzz	1996-06-17	—	—	—
0.93R6	—	1995-10-26	—	—	—
0.93R5	—	~1995-03-01	—	—	—
0.91	—	~1994-01-01	—	—	—

Integrity of the data in the releases

Data integrity is granted by a digitally signed `Release` file. To ensure that all files in the release belong to it, checksums of all `Packages` files are copied into the `Release` file.

Digital signatures for this file are stored in the file `Release.gpg`, using the current version of the archive signing key. For stable and oldstable an additional signature is generated using an offline key specifically generated for a release by a member of the Stable Release Team.
